

IMPORANT NOTICE

Prior to carrying out any installation you should refer to our website in order to confirm that this guide is current and still applicable

Installation guide **SLOT BLOK BARRIER**

SAFE HANDLING PROCEDURE

Wherever possible, manual handling of the product should be avoided by the use of mechanical lifting equipment.

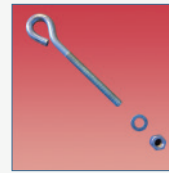

It is essential that every load is assessed prior to lifting to reduce the risk of injury.

All manual handling should be carried out in accordance with The Manual Handling Operations Regulations 1992 and later amendments.

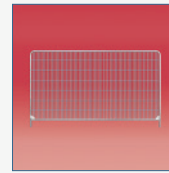

COMPONENTS

Slot Blok Barrier

Nut And Bolt

Mesh Fence Panel

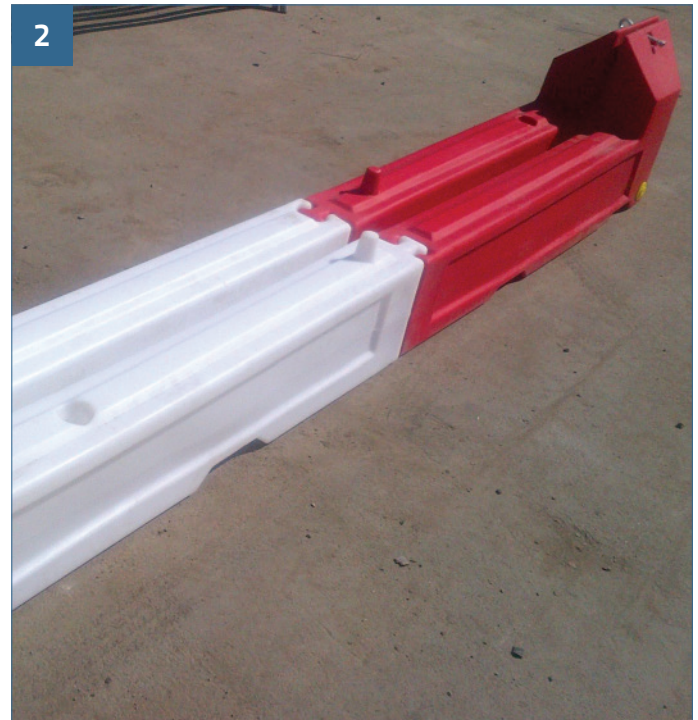

Coupler

THE INSTALLATION PROCESS

Place first barrier at starting point of intended line of installation.

Link the next barrier in place using the jigsaw connections.

Remove nut and bolt and insert the mesh panel as shown.

Replace nut and bolt and tighten to secure mesh panel (13NM).

Remove white caps and fill both barriers with water (ensure all white caps are replaced when full).

Repeat steps 1 to 5 along your intended installation line, connecting panels with couplers as shown and tighten (13NM).

Important Notice

It is the client's responsibility to ensure that the installation is fully checked on a regular basis, particularly after high winds or severe weather conditions, paying particular attention to the security of fixings used within the installation.
